

6TH TECHNOLOGY DAY HYBRID LIGHTWEIGHTING

»» 20 - 21/05/2019 ««

NEW Filderhalle Leinfelden-Echterdingen, Germany

Facts & Figures

WHY BADEN-WUERTEMBERG?

Baden-Wuerttemberg is a leading location for lightweight technology. The automobile was invented here in 1886, and the heart of the German auto and machinery industry is still beating strong. Lightweight design in architecture has its origins here – with the lightweight technology sector always opening up new possibilities.

The entire supply chain that is needed for intelligent lightweighting is to be found here – from research and development to technical design and simulation as well as manufacturing and production.

POWERED BY LEICHTBAU BW GMBH

Leichtbau BW GmbH is a non-profit economic development corporation for the promotion of trade, industry and science. It represents a network of more than 1,900 companies and over 260 research institutions in the field of lightweighting technology, being the largest network of its kind in the world.

The networking platform helps small and mid-size businesses to promote and market innovations in the lightweighting sector and furthers innovation and technology development by matching appropriate partners from academic or industrial backgrounds.

The Transatlantic Cluster for Lightweighting (TraCLight), initiated by Leichtbau BW in 2017, addresses global challenges through global collaboration: www.traclight-cluster.com

You need a solution or a supplier to lightweight your product?

INFORMATIVE, INNOVATIVE, INTERNATIONAL!

On 20th and 21th of May 2019, the 6th Technology Day Hybrid Lightweighting will be dedicated to the subject of digital transformation. The most popular event for hybrid lightweighting will for the first time take place in the newly expanded Filderhalle in Leinfelden-Echterdingen, where interesting lectures are held as well as interactive industry forums or the proven exhibition.
